Assist Animal Healthcare in EDAN Way

Efficiency

Ease your work

- 6.5 μ L test volume is suitable for animals, especially for small animals.
- Two reagents with longer shelf life and low consumption, satisfy the low sample size requirement of veterinary.
- Approximately 50% less consumption, one diluent supports more tests.

Digitization

Design to user-oriented

- Android-based operating system allows users to have the experience of smartphone operation.
- Analysis records obtained via cycle would be useful for rental business, dealers, and end-users.
- Dual system of software and hardware can accurately detect the remaining of reagent.

Accuracy

Improve performance on every species

- Independent animal algorithm and adaptive threshold make animal classification and detection more accurate.
- If an animal has a parasitic infection, allergy, etc., eosinophil can be a detection index.
- Wide linearity range allows measuring more abnormal clinical cases of animals like leukemia in dogs.

Norm

More species Less maintenance

- Cat, Dog, Horse, Sheep, Goat, Monkey, Camel, Llama, Panda, Cow, Pig, Rabbit, Rat, Mouse.
- Every 100 tests need to be maintained once, the system automatically reminds user.
- Each reagent has individual RFID card instead of barcode, regulates the use of reagents.
