HD Video Colposcope

This new HD digital colposcope serial is a perfect combination of outstanding HD camera, powerful software and convenient workstation to accommodate the rigid requirements of gynecologists in colposcopic screening. High resolution camera and unique LED light type ensure superior image quality to reproduce the examination area to the greatest extent. With professional software and analysis tool, everything becomes easy, standardized and well-regulated. Different models and accessories provides more available options to meet various demands in clinical application. This new serial is turning a new page in colposcopy.

High image quality to ensure flawless display at users' end

The outstanding full HD image quality contributes for the correct decision-making and provides the safety guarantee for the patient. Resolution is more than 900 TVL. HDMI video is also supportive for teaching and case discussion. Flexible magnification level and better vision scope provides extra clear view from different angels. High-precision technology provides superior image quality, improved clearness and focal range to facilitate the physicians' work.

Green light for the better visualization of tissue

Green light can enhance the contrast to highlight the abnormal blood vessels. The improved visualization can facilitate the physician to define the problem area.

Illumination

Our HD colposcope is equipped with 12 SMD LED in ring shape with adjustable intensity to provide ultra-bright LED illumination.

Patient management software
